## Decorative panels

Each pattern shown in the pages below is, beside the unfinished execution in basic silver steel (Raw), available in more than 50 unique colors.

When using the patterns you can use decorative strips.

The panels and the decorative strips are powder coated in a color, thus they are resistant to moisture, they can not rust and will not get dull. The panels and the decorative strips are therefore suitable for indoor and outdoor applications.

By finishing the panels and the decorative lists with a powder-coat they get a stylish, elegant look and feel.

Cleaning is easy with soap and water.

You can choose any panel pattern you want, the price remains the same.

The price per panel is only dependent on the chosen color. So you can freely choose any pattern!

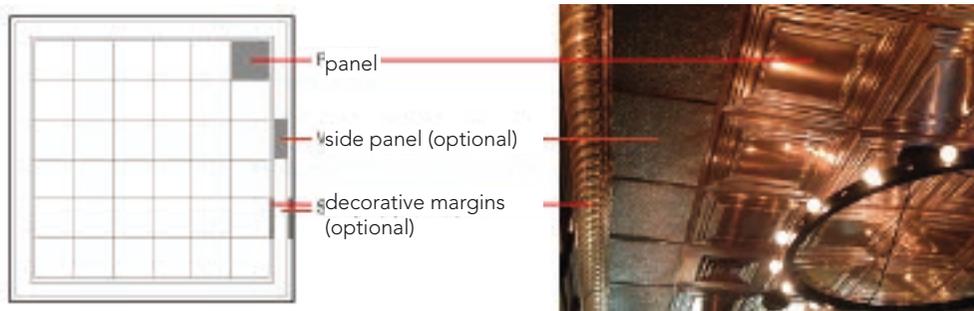

### Installation of the panels and frames and personal finish in brief

Installation of the panels is very easy via the Drop-in or Nail-up system.

At the Drop-in system, the ceiling panels in a grid of 60 x 60 cm placed and fixed with the supplied clips. The grid can be optionally placed on color by means of painting or spraying.

The Nail-up system is all easy to use, the panels are simply put, by means of mounting or tacker shooting nails on a wooden surface or sheet material such as gypsum, MDF or plywood. The dimensions of the panels when applying the Nail-up system is approximately 62 x 62 cm, the panels have an overlap of about 7 mm.

The thickness of the panels and frames is about 0.25mm.
